

CYCLE OF SHOCK / CRITICAL ILLNESS

- 1. Hypovolemic **S**
- 2. Septic **H**
- 3. Cardiogenic **O**
- 4. Anaphylactic **C**
- 5. Hypoxic **K**

Respiratory Failure }
Acute Change in Neurologic Status }

↓ Blood Flow (C.O.) or
↓ Blood Pressure or
↓ Oxygen delivery

Death

UNTREATED SHOCK IS 100% FATAL

Multiorgan Failure

↓ Organ Perfusion

↓↓ Blood Flow or Pressure

↓ Neurologic, Respiratory, and Cardiovascular Function

EARLIER RECOGNITION & EARLY GOAL DIRECTED THERAPY WILL INTERRUPT THE CYCLE
